8:00 – 9:40 am	Registration and Breakfast
9:40 – 9:45 am	Welcome and Introductions
9:45 – 10:45 am	Cleaning for a Greener Future: How Sustainability Is Shaping Cleaning Habits

In an era defined by environmental awareness and sustainability, the cleaning industry is witnessing a significant shift in priorities. Cleaning professionals are increasingly recognizing the importance of adopting sustainable practices that not only promote cleanliness but also minimize their impact on the planet.

This session will provide valuable insights from end-user surveys on the evolving landscape of sustainable cleaning practices. Participants will gain an in-depth understanding of the latest trends, innovations, and best practices that are shaping the industry's approach to sustainability.

From exploring eco-friendly cleaning products, changes in usage, preferences, energy conservation, and implementing efficient waste strategies, attendees will discover practical techniques to integrate sustainability into their daily operations, as well as address challenges and opportunities associated with transitioning to sustainable practices.

*Speaker:* *Laura Mahecha, Director of Professional Cleaning Products, Kline*

10:45 am – 12:15 pm	Navigating Compliance: Understanding Label Requirements and SDS Content in the Cleaning Industry
---------------------	--

Led by Jamie Venable, this session will provide valuable insights and practical guidance on meeting federal and state label requirements, understanding safety data sheet (SDS) content, and staying up to date with the latest regulatory standards, focusing on key areas such as hazards, ingredient disclosures (including fragrance allergens), and Proposition 65. Participants will gain a comprehensive understanding of the specific requirements for labeling consumer products, workplace only products, and cosmetics.

Additionally, we will examine OSHA's alignment with GHS Revision 7 and its impact on SDS content. Attendees will learn how to effectively navigate the complexities of SDS documentation, ensuring accurate and compliant information is provided.

**Keeping it Clean: Regulatory Compliance Review**

**Draft Agenda**  
**November 13, 2024**

---

Through engaging discussions and practical examples, participants will gain insights into best practices for maintaining compliance, managing regulatory updates, and mitigating potential risks within the cleaning industry.

*Speaker:* *Jamie Venable, Senior Consultant,  
Scientific & Regulatory Consultants*

12:15 – 1:30 pm                      Lunch

1:30 – 2:30 pm                      Government Relations Update

This session will cover key federal and state-level regulations, offering a detailed analysis of current policies, recent changes, and upcoming regulatory developments affecting the cleaning products industry. Participants will gain insights into various regulatory categories, including chemical safety, environmental protection, labeling requirements, and consumer safety standards.

Christopher Finarelli will address the implications of major legislative actions, agency rulemakings, and compliance challenges faced by manufacturers and distributors. Additionally, this session will highlight advocacy efforts, industry responses, and strategic approaches to navigating this complex regulatory environment.

*Speaker:* *Christopher Finarelli, State Government Relations & Public  
Policy (West Region), HCPA*

2:30 – 3:00 pm                      TSCA 101

The Toxic Substances Control Act (TSCA) stands as a cornerstone of environmental regulation, governing the manufacture, use, and disposal of chemicals to ensure public health and environmental protection.

Designed to provide a comprehensive overview from basics to complexities, participants will gain a clear understanding of TSCA's role in assessing and managing chemical risks. This session will cover the essential principles of TSCA, including its scope, regulatory requirements, and recent updates, as well as offer essential insights into navigating TSCA's intricate framework and its implications for the consumer products industry and product stewardship.

*Speaker:* *Nicholas Georges, Senior Vice President, Scientific &  
International Affairs, HCPA*

3:00 – 4:00 pm

State Regulatory Agency Outlook

This session will provide an overview of the Washington State Department of Ecology's work on cleaning products, with a focus on chemicals management policies through the Safer Products for Washington program. Attendees will hear specifically about potential reporting requirements or restrictions for certain chemicals in cleaning products. This session will also discuss the post-consumer recycled content program, which sets specific recycled content rates for cleaning products.

*Speaker:*

*Kimberly Goetz, Legislative Coordinator, Washington State Department of Ecology's Hazardous Waste and Toxics Reduction Program*

4:00 – 5:00 pm

Air Quality Regulations in the U.S.

Volatile organic compounds (VOCs) and Maximum Incremental Reactivity (MIR) are pivotal concepts at the heart of environmental legislation, influencing policy development and industry practices nationwide. This session will cover the fundamental definitions and classifications of VOCs, as well as the nuanced implications of MIR calculations.

Whether you're new to the topic or seeking a refresher, this session will provide a comprehensive overview of state and federal frameworks and equip attendees with crucial insights into how these regulations shape air quality policy and industry compliance.

*Speaker:*

*Nicholas Georges, Senior Vice President, Scientific & International Affairs, HCPA*
